

Integration begins here!

System Integrator™ 4.5

System Integrator 4.5 (SI 4.5) is the industry's most comprehensive system integration software for SI professionals, bringing together the power of AutoCAD and the ease-of-use of Microsoft Visio combined in one no-compromise solution. SI 4.5 links all equipment to product lists and drawings, creating a single, coordinated, dynamically-linked, instantly updatable project file.

One source, endless solutions.

Now you can have it all. System Integrator 4.5 brings power and ease together in one environment providing a high degree of synchronization, increased performance, added flexibility and more customization options. SI 4.5 manages every important aspect of your business.

Design

- Complete designs in minutes
- Create custom templates
- Drag-and-drop ease-of-use

Engineer

- Create plan views, functional views and elevations in AutoCAD
- Instantly create floor plans, elevations, flow and schematic drawings in Visio
- Insert pre-engineered systems
- Synchronize product lists, documents and drawings

Document

- Update change orders as they occur
- Create customized MS Word reports with graphics

Estimate

- Develop fast, accurate bids
- Adjust bids in one step
- Build pre-engineered packages and accessories

Sell

- Quickly produce powerful presentation documents, customizable for your look
- Win more bids with the competitive advantage of fast, accurate quotes

Install

- Produce full installation documentation
- Automatically generate check lists, wire labels and installation reports

Manage

- Generate product ordering
- View labor and profit reports

** Sold separately

System Integrator 4.5

Synchronize your entire organization.

SI 4.5 dynamically links equipment lists and drawings. Items added to the equipment list are available to every drawing; equipment added to the drawings is instantly updated on the equipment list. Accurate up-to-the minute project files are available to everyone in the network.

Plan

- **Create detailed designs and as-built drawings faster.**

SI 4.5 works with the precise drawing tools and efficient drafting in the plan, elevation and functional views of AutoCAD 2005/2006, or work with the rich graphic capabilities, pre-engineered drawing importation, easy-to-use drag-and-drop graphics and scalable vector drawings in Visio 2003. You have a choice of using both together or deciding what you will create in each environment.

- **Easily configure your database**

Download from our extensive library of product data and custom shapes provided by our manufacturer partners, which includes critical information such as dimensions, inputs and outputs, phase of installation, time to install, price, cost, vendor SKU and more, or quickly create your own. You can also subscribe to an enhanced product offering of data and shapes.

- **Generate dynamic bids more quickly**

Standard labor rates and installation times are included with each product and are modifiable. Fast, accurate bids are generated as quickly as you can specify equipment to rooms and are dynamically updated throughout every part of the project. Change individual labor or equipment pricing for competitive bids in one simple step.

Present

- **Produce compelling proposals**

Create fast, accurate, customizable proposals.

- **Provide graphics with proposals**

Show your client a visual representation of their finished job in the proposal.

- **Present on the Internet**

Turn project drawings and documents into HTML pages and easily post them to the Web for project management or client review.

Profit

- **Effectively manage your profitability**

Analyze past and present projects with entire suites of easily customizable management and installation reports that can be shared throughout the organization. Instantly adjust cost factors to increase profitability or become more competitive.

- **SI 4.5 helps you remember the correct accessories**

Once accessories are added to products, SI 4.5 automatically prompts users to include them each time a product is specified. Accessories added by any person in the process are available to everyone in your network on any project.

- **Pre-Engineer Packages of Equipment**

Engineering can create packages of equipment from your most successful system designs. Everyone, including sales, has immediate access to those pre-engineered system packages to re-use in future projects.

Reports

Instantly generate these reports:

Client Reports

Proposals/Bids
Scope of Work
Contracts
... and more.

Project Management Reports

Detailed Cost Summary
Project Hours
Wire Schedules
Wire Labels
Job Costing
Work Orders
... and more.

Accelerate Your Business

D-Tools offers a selection of software options that have been designed to enhance the power, performance and depth of integration that you can achieve with SI 4.5.

Business Manager

Integrates sales and work orders, workflow management including basic job costing, and an interface for communication to major accounting programs.

QuickLinks

Designed to work with Intuit's popular QuickBooks™ accounting program. Allows users to create purchase orders, sales orders and invoices by importing directly from SI 4.5 in real time.

Networking Solutions

LANSync — for sharing a database with multiple users over a Local Area Network (LAN).

WebSync — for sharing the users' product database over the Internet.

Free Product Data Downloads

Our Manufacturer Partner Program is a formal relationship between D-Tools and manufacturers that facilitates free product data downloads for the end user. Manufacturer Partners have the ability to provide data, information on accessories, packages, Web links and custom shapes.

Data Subscriptions

Users may subscribe to receive data from specific product manufacturers or manufacturers that do not participate in the D-Tools Manufacturer Partner Program. Inexpensive annual data subscriptions are available upon request.

SI 4.5 Training

D-Tools offers a wide range of training options to meet individual needs and budgets, including custom training at your place of business, regional training sessions and online training modules.

Software Assurance and Financing

D-Tools offers software assurance purchase options on all products. Simply pay 65% of the software's list price upon ordering and pay 3% of the list price monthly to receive all future software upgrades. Other financing options are available, including split payment and leasing plans.

System Integrator Minimum System Requirements

Computer and processor	Personal computer with an Intel Pentium 4, 1.8 GHz.
Memory	256 MB of RAM or greater.
Hard Disk	300 MB of available hard-disk space. Optional installation files cache (recommended) requires an additional 200 MB of available hard-disk space.
Drive	CD-ROM or DVD drive.
Display	XGA (1024 x 768) or higher-resolution monitor.
Operating System	US-English version of Microsoft Windows® 2000 with Service Pack 4 (SP4), Windows XP or later.
Other	To create CAD files, the Pro version requires AutoCAD 2005, 2006 (not LT) which is purchased separately. Requires Microsoft Visio 2003 (included). For complete system requirements, visit www.d-tools.com .
